DELAYED.

We regret to know that the Sewer Commission are meeting with opposition from some property owners who decline to give a legal permit to cross private property. Some Excellent Work.

"Our Man About Town" dropped into the industrial building of the academy and was surprised to see the elegant work being done there. A set of furniture made by young men of the school will be shipped to C. W. B. M. headquarters at Indianapolis to show the proficiency which they have attained. Lenix Swango, Joseph Estep, Carl Pratt and others spend a few hours each day in practical joinery and they have become almost adepts. The first named had made a complete set of furniture for his own use, working at odd times, and a table, made entirely by Carl Pratt, will compare with any article from the factories. Claude Thomas Making Good.

Harry Sommers pays this deserved compliment to a good man: "We do not know Senator Claude Thomas of the county of Bourbon, but we have carefully noted his record in the State Senate and we want to say for him while we have differed from some of his positions and a few of his votes, he has made good. His reform prison bills alone, which he has been able to put through the Legislature mark him as a patriotic citizen of distinguished ability. He has won the respect and admiration of the members of the Senate who have differed most radically from him. He stands out conspicuously as one of the few Senators who is more popular with the people now than when the Senate convened. We salute you Senator Thomas. Your integrity, your courage and your ability mark you as a public servant after our own heart."

Insurance.

It costs no more to buy insurance in the Hartford Fire, with an honorable business record of 100 years, a payment of \$100,000,000 in losses, than to insure in a company with a reputation to make. We present The Hartford, and pay all losses in cash without discount. H. Clay McKee & Sons.

Best Work at Fifty.

In the industrial world it has become accepted that a man is too old at 40, and the London county council works department decided last year not to engage men above 35. How is it in the intellectual world? Despite all the evidences of precocity, Mr. Dorland arrives at a conclusion which gives an average of 50 for the master work of great men.—T. P.'s Weekly.

Not Like a Hen.

"The female codfish," remarked the boarder who had been gleaning statistics from between the covers of a patent medicine almanac, "lays more than a million eggs. Now, what do you think of that?" "I think," rejoined the Cheerful Idiot, "that it's a mighty lucky thing for the codfish that she doesn't have to cackle over every egg."

National Conversations.

If you see three men standing together on the sidewalk in any given country, you can guess the subject of their conversation. In Germany it is the army; in Russia the bureaucracy; in France, women; in the United States, business; in England, sport, and in Turkey, nothing at all.—La Derniere Heure, Brussels.

Friends in Need.

What need we have any friends, if we should ne'er have need of them? They were the most needless creatures living, should we ne'er have use for them, and would most resemble sweet instruments hung up in cases that keep their sounds to themselves.—Shakespeare.

No Moral in This Story.

In June, 1898, a poor man called at the humble dwelling of a washerwoman on the West side. He said he was starving, and she gave him half a dollar. Nothing was heard of him until one day last week, when he called again and got another half dollar.—Smart Set.

'Tis in Star's Atmosphere.

Observations of the spectrum of Alpha Scorpii, made at the Cape of Good Hope, have shown a puzzling line that an English astronomer has attributed to tin. If this proves to be correct, it is the first discovery of tin ever made in the atmosphere of a star.

The Sympathy of Friendship.

It is sublime to feel and say of another, I need never meet, or speak, or write to him; we need not re-enforce ourselves or send tokens of remembrance; I rely on him as on myself; if he did thus or this, I know it was right.—Emerson.

Remarkable Old Gentleman.

Hallsville, Mo., March 12, 1910. Mt. Sterling, Ky. Advocate:

In looking over my diary I find clipping from Advocate of about two years ago with the following statements: Esq. R. B. Crooks had never sworn an oath nor been under the influence of whisky in his life. J. G. Trimble, Sr., has this record, nor has he ever taken a chew of tobacco or smoked."

Good my old friends, thanks for such statements from you at your ages.

Allow me a little space please. I never was in a saloon in my life, never took a drink of whisky, nor ever saw a man do that, never tasted chewing gum, nor drank the second glass of beer, never tasted the so-called soda water. Don't chew nor smoke tobacco nor swear, never went to a dance, never was in a theatre, never saw a horse race, play no games under the sun. Have been to county courts in Paris, Carlisle, Flemingsburg, Owingsville, and attended Mt. Sterling courts for years and never have seen a fight between men in all my life. Goodness! what a good record for Mt. Sterling for 50 years.

I don't drink coffee nor eat cooked cabbage, don't drink ice tea nor lemonade, nor eat ice cream, and I am alive too and weigh 243 pounds.

You know now how I vote on wet and dry and on politics by my statements above. I have been a member of the church for 58 years, not too good yet.

Come up ye old men and testify and let's shake hands and start on the home walk (for we can't run) for a better life in our older days. May the good Lord direct us old ones.

Marriage of Charles Berkley and Miss Etta Hedges, both of Hallsville took place recently. Miss Hedges was assistant in the Postoffice at Hallsville. Her folks came here from Hedges station, west of Mt. Sterling, Ky. They are first-class young folks. They go to the farm. Best wishes attend them.

March to date, one little snow, 12 fair days. Warmest day 76 degrees, coldest 27 degrees.
